

Deva Curls Most FAQ

What makes Deva Curl unique?

Deva Curl is a dry cutting technique using a No Comb Method, meaning the comb is not used during the cutting service. Your hair is cut dry, based on how your curls lay and where they fall on our head. Our curl pattern is so different throughout the hair, that when we have them wet and combed repetitively, the curl is not in its truest form and lay differently once it's dry. The benefit of this type of cut is that as your cut grows out, you avoid the infamous triangle shape.

If I wear my hair curly and straight, is Deva still a good option?

The Deva Curl cut is so versatile and certainly an option for those who wear their hair in both styles. If you favor smooth over curls on a regular basis, I prefer to do a combination haircut that will give you a great end result no matter the style.

How often should I wash?

Your wash cycle will vary based on your activity level and how your hair was styled on Day 1. I'm a firm believer that a good hair day on day 1 will get you longer in between re-styling.

What do I do on day 2?

This question is one of the hardest to answer without getting my hands in your hair and seeing those curls for myself, so I will share my routine instead of giving you a product diagnosis for you! (Come see me for your own product cocktail!)

I flip my hair upside down and use my fingertips to get my hair off my scalp, and re encourage my curls by scrunching them upwards. I use my favorite Texturizing Mist at my roots if I slept a little funky or if hair is laying too flat. I love to use my favorite conditioning mist Set it Free if I have a halo of frizz during the rainy months or humid summer days.

How do I know if I need gel or a cream?

The difference between which products you use will be based on personal preference and what you want your end results to be! Are you looking for more definition and control? You're likely looking for a gel. Don't worry, the Deva system isn't like what we were working with in the 90s! Are you looking for more hydration and a soft hold? You're likely looking for a cream. Not sure what you want? A wash and style is a great way to try new products and styling techniques.

Are masks necessary?

Absolutely sister! Have you ever waited too long to put your moisturizer on and your face gets tight? Your hair is doing the same thing when it gets thirsty. No matter your curl texture, our hair is always looking for something more. We're either in need of more moisture, hydration or strengthening. Not all masks are created equal, and what you're in need of is dependant on

what hair struggles you have. This is based on a personal recommendation so feel free to reach out with further questions to decide what you need.
